

## Exercise 2: Designing Entities Household Furniture

David Bishop | June 6, 2022

### Full Explanation

In the Household table, each household is assigned a id(PK) with the household's address, city, province, and postal code. The table has the furniture's id(FK), that corresponds to it's own table with the furniture's colour and type id(FK). The type table has info about the type of furniture it is with it's name of what it is, material, height, width, and weight.
